Profile

I'm a developer that is passionate about computer science and technology. I enjoy learning new skills and improving the ones I already have. Capable to adapt to the new technologies and tendencies. Skilled at communicating and learning mutually with other people. When I'm not programming, I am playing videogames, watching movies or spending time with my friends and family.

Experience

Grupo Panamá   July 2022 – Now
Systems Department – Desktop Developer

- Maintenance and debugging of information systems.
- SQL Server database administration for proper information flow and management.
- Requirement analysis and modules development according to clients' necessities focused on the organization operation.
- Reports creation based on users' criteria and necessities.
- Training and streamlining in the department on new processes development for better flow, efficiency and growth in the environment.

Mazatlán City Hall   September 2017 – December 2017

- Software and hardware maintenance and updating.
- Operating systems installing.
- Technical troubleshooting on computer systems.

Education

Universidad Autónoma de Sinaloa   August 2016 – July 2021
Computer Science Faculty Mazatlán

Bachelor's Degree in Information Systems Engineering
Accentuation in Computer Application Development

Software Projects

Portfolio available on: https://angel-d-v-crawford.github.io/

- **App Ideas**: A web app used to take notes of application ideas. Save details like the project requirements, the technologies to use, and a difficulty indicator for anyone who wants to implement the project idea based on their skills.
- **Xelsher**: Social network web application where anyone can make small pixelarts and share them with the world.
- **Pendroid**: Android Application where you can make a drawing and save it as an image.
- **MP3 Player**: Desktop MP3 Player where you can listen to your favorite songs and make a playlist.
- **Tic Tac Toe**: Desktop Tic Tac Toe game. Have fun playing with the AI. Just for one player.

All projects are available on GitHub:
